2018 U.S.-EU: Bridging NanoEHS Research Efforts Joint Workshop

October 11-12, 2018
470 L'Enfant Plaza SW
Suite 8001
Washington, D.C. 20024

[CLICK HERE TO REGISTER NOW!](#)

QEEN II will highlight new research on the tools and methods available to characterize and quantify effective population exposures, as well as the presence and release potential of nanomaterials. The QEEN II program will address the progress in integrating exposure, hazard, and risk to reduce uncertainties in nanomaterial EHS assessments. This event is sponsored by the Consumer Product Safety Commission and co-hosted by the Department of Labor OSHA and the National Nanotechnology Initiative.

The 2018 U.S.-EU: Bridging NanoEHS Research Efforts joint workshop will bring together the U.S.-EU Communities of Research (CORs), which serve as a platform for American and European scientists to share information on nanoEHS research. This will be the 7th event in a series of joint nanoEHS workshops organized by the U.S. National Nanotechnology Initiative and the European Commission.
